FROZEN SEMEN

- (a) If frozen semen is being imported from a foreign registered stallion, that stallion must be registered or listed with the PHAA prior to breeding. (refer Rule 101)
- (b) All foals conceived through the use of frozen semen shall be parentage DNA tested and validated prior to registration with the PHAA. No foal will be accepted for registration unless both sire and dam have parentage DNA test results on record with the PHAA.
- (c) There are no limitations to the period of time the semen can be stored or utilised after the death or gelding of a stallion.
- (d) Frozen semen from deceased stallions will be accepted for registration or listing, with the PHAA provided the stallion has been registered and upgraded for breeding purposes with an approved registration authority in its country of origin. The last registered owner of the stallion must authorise the listing or registration with the PHAA
- (e) Should the stallion be sold, die or be gelded, the PHAA must be notified by the registered owner.
- (f) **Frozen semen owned by someone other than the Stallion Owner**

In the case where frozen semen from a stallion registered or listed with the PHAA is purchased by someone other than the registered Stallion Owner, the purchaser may record this information with the PHAA. In such cases the following rules apply:

- a. A registration of Frozen Semen Ownership application may be lodged together with the proscribed fee. The signature of the current recorded stallion owner or agent, or evidence from the registered stallion owner or agent at the time of purchase, must be provided.
- b. Upon approval of the application a certificate for registration of Semen Ownership may be issued by the PHAA which allows the owner of the semen to sign and lodge breeding returns for the stallion whose semen they own. A copy of the semen ownership certificate must be included with the stallion breeding return.
- c. The registered owner of semen is only authorised to lodge breeding returns and service certificates for the semen which they own. These breeding returns can be in addition to returns lodged by the stallion owner or other owner(s) of semen.
- d. A certificate for Registration of Semen Ownership may only be cancelled by the registered owner of the semen.
- e. A certificate for the Registration of Semen Ownership may be transferred to a new owner upon completion of a transfer form and payment of the prescribed fee.
- f. For all transactions, including registration, transfers and lodging of breeding returns for frozen semen, the Semen Owner must be a current financial member of the PHAA.
- g. In no case will the PHAA assume any responsibility on settling any contractual or civil matter that arises regarding ownership or otherwise of frozen semen.
- h. The Board of Directors reserves the right to deny or accept applications for Semen ownership on a merit and case by case basis.**

(Rule change approved BOD meeting May 2014)
